Al Hajis Perfumes

Website launch, SEO foundation, product marketing and social media for a UAE fragrance retailer (circa 2018)

Retail & E-Commerce	New Website	SEO + Product Marketing	Social Media
---------------------	-------------	-------------------------	--------------

MY DIGITAL MARKETING CONTRIBUTION

- Supported the launch and digital marketing of a new website, helping move the retail brand toward a stronger online product and discovery experience.
- Structured SEO around perfume categories, products, brand searches and retail-intent queries, with on-page optimisation for product/category visibility.
- Worked on product marketing: product-page positioning, promotional messaging, offers, featured fragrances and digital merchandising support.
- Managed and supported social media content and promotion around fragrances, new products, gifting, offers and retail brand awareness.
- Connected website, search and social activity so product discovery could support both online enquiries/purchases and physical-store awareness.

WHY THIS CASE MATTERS

This project shows early hands-on e-commerce and product-marketing experience, not just lead-generation marketing. It demonstrates the ability to translate a large physical retail catalogue into a digital website, search strategy and social presence for a consumer/luxury product category.

CURRENT PUBLIC FOOTPRINT - CONTEXT ONLY			
~27.5K Est. Monthly Visits third-party 2026 estimate	2,480+ Products current e-commerce footprint	40+ Store Network public company profile	~2.4K LinkedIn Followers current public profile

Important attribution note: Historical analytics from 2018 are not available. The figures above describe Al Hajis Perfumes current public digital/retail footprint and are not presented as results achieved during my 2018 work. My attributable scope was the new website, SEO foundation, product marketing and social-media activity.
