Executive Summary

ADAM Global's digital acquisition program combined SEO, high-volume content, Meta advertising, Google Ads, remarketing, local search and CRM-based lead management rather than relying on a single source of demand.

- A reported month generated 1,323 Salesforce leads, with Facebook and website activity representing the largest recorded source groups.
- Across the supporting SEO acquisition property, the report recorded 14,190 organic keywords, 11,010 estimated monthly organic traffic, domain authority 26 and 17,200 backlinks.
- All 55 tracked priority SEO keywords listed in the report ranked within Google's Top 10; 21 were in position #1, 34 were Top 3 and 47 were Top 5.
- The Top 20 company-setup content landing pages generated 4,756 sessions and 3,965 new users in the reported snapshot.
- adamglobal.ae retained overall traffic even as Paid Search was reduced sharply: Paid Search fell from 997 in May to 75 in July (-92.5%), while total traffic moved from 2,422 to 2,472 (+2.1%).
- Built and grew ADAM Global's social-media presence to approximately 44.5K combined platform followers during the management period: about 18K on Instagram, 17.5K on Facebook and 9K on LinkedIn.
- The cost calculator became the highest-viewed adamglobal.ae page in the analytics snapshot, with 2,506 views and 1,364 users, and Salesforce attributed 84 lead records to the Cost Calculator source.

Portfolio takeaway

This is strongest as a full-funnel growth case study: build search demand organically, use paid media to accelerate acquisition, create conversion assets such as calculators and chat, and connect marketing activity to Salesforce lead records.

Source note: Historical figures are taken from the uploaded AG Digital Marketing Report July. Budget ranges and the approximate social follower levels achieved during the management period are portfolio-owner supplied role context. Current social follower counts are a public-profile snapshot supplied in August 2026.

Digital Ecosystem & Budget Responsibility

Multi-property, multi-channel acquisition

The historical report covers adamglobal.ae together with Dubai Business Advisors, a supporting content/acquisition property used for business-setup search visibility. Campaign activity spans Google Ads, Meta (Facebook and Instagram), AdRoll remarketing, Google Business Profile / GMB, guest posting and organic search.

OFF-SEASON BUDGET

Typical monthly media envelope

AED 36,905

DOCUMENTED CSP SPEND

Specific report snapshot/subset

AED 80k-100k

PEAK-SEASON BUDGET

Typical monthly media envelope

3 platforms

DOCUMENTED MEDIA MIX

Google, Meta, AdRoll

Sample documented spend allocation

Platform	Spend (AED)	Share of documented spend
Meta / Facebook	24,525	66.5%
Google Ads	8,980	24.3%
AdRoll	3,400	9.2%

The report's AED 36,905 CSP spend should be treated as a campaign/period subset. It does not conflict with the broader AED 60k-100k seasonal budget responsibility supplied for the portfolio.

Source note: AG Digital Marketing Report July, campaign summary pages 5 and 16-17.

Channel Resilience: Traffic Held While Paid Search Was Reduced

One of the strongest signals in the historical data is channel diversification. From May to July, Paid Search on adamglobal.ae fell 92.5%, yet total traffic was 2.1% higher in July than May. Direct traffic grew 168.5% and Referral grew 218.2%, while Social remained a substantial contributor.

adamglobal.ae audience overview from the internal report.

-92.5%	+2.1%	+168.5%	+218.2%
PAID SEARCH CHANGE	TOTAL TRAFFIC CHANGE	DIRECT GROWTH	REFERRAL GROWTH
997 in May to 75 in July	2,422 in May to 2,472 in July	534 to 1,434	33 to 105

By July, Direct represented about 58% of reported adamglobal.ae traffic, Social about 19%, Organic Search 8.5%, Referral 4.2% and Paid Search only 3.0%. The mix indicates that brand/direct and non-paid channels were carrying meaningful acquisition volume as paid search was scaled down.

Source note: AG Digital Marketing Report July, page 7 audience overview.

SEO Growth: High-Intent Search Visibility at Scale

The SEO program built a broad footprint around company formation, business setup, licensing and sector-specific market-entry intent. The report snapshot shows 14,190 organic keywords, 11,010 estimated monthly organic traffic, domain authority 26 and 17,200 backlinks for the supporting SEO acquisition property.

14,190	11,010	17,200	26
ORGANIC KEYWORDS	ORGANIC MONTHLY TRAFFIC	BACKLINKS	DOMAIN AUTHORITY
SEO tool snapshot	Estimated visits/month	SEO tool snapshot	SEO tool snapshot

Distribution of the 55 tracked priority keywords listed in the report.

The tracked ranking set is unusually strong: 21 keywords were position #1, 34 were Top 3, 47 were Top 5 and all 55 were within the Top 10. Examples include 'dubai business consultancy', 'holding company formation in dubai', 'company liquidation in dubai', 'how to get a food license in Dubai', 'How to Start an AI Company in Dubai' and 'how to open a cafeteria'.

Source note: AG Digital Marketing Report July, pages 2-5. SEO metrics in this section relate to the report's supporting acquisition property rather than being presented as adamglobal.ae-only metrics.

Organic Traffic Became the Core of the Supporting Acquisition Property

The January-to-July audience table shows Organic Search consistently dominating traffic to the supporting Dubai Business Advisors property. In July, Organic Search contributed 11,057 of 13,040 total recorded visits, approximately 84.8% of the month's traffic.

Monthly total traffic and Organic Search from the report's Jan-Jul table.

The report also documents ongoing SEO execution: 17 new blogs in June, broken-link corrections, guest posting on Medium, Reddit, Quora and Issuu, backlink activity, and plans to add 20+ additional blogs plus Bing and Yandex submissions.

Why this matters for a portfolio

This demonstrates both strategic and hands-on SEO execution: topic research, content production, technical cleanup, authority building, search-engine distribution and performance reporting.

Source note: AG Digital Marketing Report July, pages 2, 6-8 and 20.

Content Engine: High-Intent Pages Generated New Users

The Top 20 company-setup content pages in the report generated 4,756 sessions, 4,182 users and 3,965 new users. These were not generic awareness articles; they targeted service-adjacent commercial questions such as opening clinics, restaurants, gyms, investment companies and licensing specific business activities.

Top ten of the twenty company-setup landing pages listed in the report.

4,756	4,182	3,965	657
TOP-20 CONTENT SESSIONS	TOP-20 USERS	TOP-20 NEW USERS	TOP PAGE NEW USERS
Summed from report table	Summed from report table	Summed from report table	Open a Cafeteria in Dubai

A separate Search Console-style landing-page cluster for trade-licence content recorded 62,709 impressions and 474 clicks. The leading listed pages included gold-trading licence, professional licence, trade licence in Dubai, business-licence renewal and home-business licence topics.

Source note: AG Digital Marketing Report July, pages 12-14.

Paid Media: Multi-Platform Acquisition and Remarketing

Paid acquisition was managed across Meta, Google Ads and AdRoll, with targeting across the UAE and international markets including Canada, Australia, New Zealand, the United States, Egypt, Malaysia, Singapore, the UK, Germany, Italy, France, Nordic markets, Kazakhstan, GCC countries, India and Pakistan.

Meta platform-reported results. These results are not treated as confirmed Salesforce leads.

In the July Meta snapshot, the lead-generation campaign reported 846 results from AED 22,660 spend at AED 27 per platform result, while a Cost Calculator campaign reported 955 results from AED 936 at about AED 1 per result. The India & Pakistan campaign reported 198 results at AED 5 per result.

Remarketing

12,862	854	437,020	AED 1,549
ADROLL VISITORS	RETURNED	IMPRESSIONS	SPEND
Retargeting snapshot	Retargeting snapshot	Retargeting snapshot	Reported AdRoll line

Google Ads covered multiple intent clusters including Business Setup, Clinic Business Setup, Holding Company & Representative Office, Company Liquidation, Russian audiences and YouTube. Because the historical report's Google conversion column contains values that exceed clicks in several rows, this portfolio report does not use those legacy conversion values as confirmed lead counts.

Source note: AG Digital Marketing Report July, pages 5-6 and 16-18.

CRM Impact: 1,323 Salesforce Leads in a Reported Month

Salesforce recorded 1,323 total leads in the reported month. Facebook was the largest listed source with 808 lead records, followed by Website with 282. WhatsApp, the Cost Calculator and SalesIQ Chat were also meaningful lead pathways.

Source-wise Salesforce counts shown in the report. Minor source-count inconsistencies are noted in methodology.

1,323	808	282	84
SALESFORCE LEADS	FACEBOOK SOURCE	WEBSITE SOURCE	COST CALCULATOR SOURCE
Reported month	Largest recorded source	Second-largest source	CRM-attributed lead records

Six-month pipeline scale

The six-month lead-stage view shows 8,364 total stage records and 5,077 in Nurturing. The report displays 518 converted leads in one summary tile and 523 converted in the stage breakdown, so the portfolio uses 'approximately 520 converted' rather than asserting a single exact number.

Attribution discipline

Dividing the documented AED 36,905 spend by 1,323 total Salesforce leads gives an arithmetic equivalent of about AED 28 per recorded lead, but this is not presented as a true paid CPL because the Salesforce total includes website, WhatsApp, chat and other sources.

Source note: AG Digital Marketing Report July, pages 5-6 and 17. Historical stage categories are not fully additive across all report views.

Conversion Assets: Cost Calculator, Forms, Chat and Local Search

Cost Calculator became the strongest adamglobal.ae page

2,506	1,364	215	48
COST CALCULATOR VIEWS	COST CALCULATOR USERS	FORM STARTS	FORM SUBMITS
Highest-viewed listed page	Analytics snapshot	adamglobal.ae event snapshot	adamglobal.ae event snapshot

The analytics event table also records 123 Click-to-Chat events on adamglobal.ae. Across the supporting DBA property, the report shows 301 Click-to-Chat events and 264 form starts.

The Cost Calculator links acquisition and conversion strategy particularly well: it was the site's highest-viewed listed page, had a dedicated Meta campaign and was also captured as a Salesforce lead source.

Google Business Profile / local actions

16	129	156	126
REPORTED CALLS	DIRECTION CLICKS	WEBSITE CLICKS	ADAM GLOBAL GBP ACTIONS
DBA + Adam Global	Across reported profiles	Across reported profiles	8 calls + 59 directions + 59 website clicks

Source note: AG Digital Marketing Report July, pages 6, 10-11 and 17-18.

Audience Reach: UAE Core with International Demand

The adamglobal.ae country snapshot was led by the UAE, followed by India, the United States, Malaysia, Pakistan, Egypt and Saudi Arabia. This aligns with an international business-setup proposition rather than a purely local Dubai audience.

Country-level users shown for adamglobal.ae in the historical report.

The supporting DBA property had an even larger UAE audience in the same report, with 7.2k users from the United Arab Emirates, 1.3k from India, 608 from Pakistan, 574 from the United States and 520 from the United Kingdom.

Current public brand footprint, checked August 2026

- The current ADAM Global UAE website positions the business as an end-to-end business solutions platform founded in 2002 and states connectivity across 140+ countries.
- Current public social footprint: approximately 24K Facebook followers, 21.5K Instagram followers and 12K LinkedIn followers, or about 57.5K combined platform followers. Combined platform counts are not unique people.
- The separate ADAM Global Network website describes cross-border advisory coverage across 50+ jurisdictions and 1,000+ members.

These 2026 public footprint figures are included only as current context. They are not attributed as outcomes of the historical marketing period after the portfolio owner's tenure. They demonstrate that the brand communities established and grown during that period remained active and continued expanding.

Social Media Growth & Brand Community

Social media was not treated as a standalone posting function. The role included building and developing ADAM Global's corporate profiles, creating organic content, running Meta campaigns and connecting social activity to landing pages, WhatsApp, website forms and Salesforce lead generation. During the management period, the three principal profiles had reached approximately 44.5K combined platform followers.

Follower levels are approximate. Current profile counts are shown as a 2026 snapshot and are not attributed to the portfolio owner after the management period.

Platform	Approx. during management	Current public snapshot	Change since
Instagram	18K	21.5K	+3.5K (+19%)
Facebook	17.5K	24K	+6.5K (+37%)
LinkedIn	9K	12K	+3K (+33%)
Combined	44.5K	57.5K	+13K (+29%)

- The historical report independently confirms static/video social publishing, Facebook/Instagram advertising and international Meta targeting, while profile creation and tenure follower levels are supplied as role context by the portfolio owner.
- Supported international audience development and campaign targeting across the UAE, GCC, India, Pakistan, the UK, the US, Canada, Australia and European markets.
- Connected organic social activity with Meta lead-generation campaigns, website landing pages, WhatsApp, remarketing, the Cost Calculator and Salesforce CRM.
- Created and managed static creatives, videos, educational posts, service promotions, business-setup content, offers and corporate communications.
- Built and established the brand presence across Instagram, Facebook and LinkedIn, then developed each channel through ongoing content and campaign activity.

Source note: Social profile creation and approximate follower levels during the management period are portfolio-owner supplied. Current follower counts are August 2026 profile snapshots supplied from the public Facebook, Instagram and LinkedIn pages. Historical campaign activity is corroborated by the uploaded AG Digital Marketing Report July.

What the Case Study Demonstrates

1. Performance marketing management across a seasonal AED 60k-100k monthly media envelope, with spend allocation across Meta, Google Ads and remarketing.
2. Full-funnel lead generation linked to Salesforce, including paid media, website, WhatsApp, chat and conversion-tool sources.
3. SEO strategy and execution across commercial-intent company-formation, licensing and sector-specific queries, including technical fixes, content scaling, guest posting and backlinks.
4. Conversion-rate optimization through calculators, forms, chat and high-intent landing pages.
5. Audience and channel diversification so traffic could be sustained even when Paid Search was reduced.
6. Social-media brand building and community growth, including approximately 44.5K combined followers across Instagram, Facebook and LinkedIn during the management period, alongside local and international acquisition through Google Business Profile and country-targeted Meta campaigns.
7. Measurement and reporting across analytics, Search Console-style data, ad platforms and CRM, with the ability to identify legacy attribution issues rather than overstate results.

Portfolio achievement statement

Managed and scaled ADAM Global's integrated digital marketing ecosystem across SEO, Google Ads, Meta Ads, remarketing, content, social media, local search, analytics and Salesforce lead generation, with monthly media budgets ranging from AED 60K-70K off-season to AED 80K-100K in peak periods. Built and grew the brand's social profiles to approximately 44.5K combined followers during the management period (Instagram ~18K, Facebook ~17.5K, LinkedIn ~9K), while the historical report records 1,323 Salesforce leads in a reported month and a priority SEO set with 55 Top-10 rankings, including 21 position #1 keywords.

Evidence, Methodology & Portfolio-Safe Caveats

This case study is designed for portfolio use and intentionally separates verified historical evidence, portfolio-owner context and current public information.

Evidence type	Used for	Treatment
Uploaded internal report	SEO, traffic, ads, leads, landing pages, countries, events	Primary historical evidence
Portfolio-owner context	AED 60k-70k off-season and AED 80k-100k peak budget	Clearly labelled as role context
Current adamglobal.ae	Business positioning, 140+ country reach	2026 context only
Current LinkedIn / adamglobal.com	Follower and network footprint	2026 context only

- Social follower levels achieved during the management period are approximate portfolio-owner recollections, not archived platform exports. Current follower counts are a later public-profile snapshot and are shown only for continuity/context.

Important caveats

- The uploaded PDF is a management report, not raw GA4/Ads/CRM exports, so this case study uses the report's figures as documented rather than attempting to reconstruct unavailable raw data.
- Some historical Salesforce stage totals and source counts differ slightly between report pages. Where this matters, the case study uses rounded wording or the explicit headline total rather than forcing a false reconciliation.
- Meta 'results' are kept as platform-reported results and are not automatically described as Salesforce leads.
- Legacy Google Ads conversion columns appear to contain measurement/value issues in some rows; those values are not used as confirmed lead counts.
- The 14,190 organic keywords / 11,010 monthly organic traffic snapshot appears in the report alongside the supporting Dubai Business Advisors SEO property, so it is presented as portfolio-wide/supporting-property SEO evidence rather than adamglobal.ae-only performance.

Source basis

- AG Digital Marketing Report July, 20 pages, supplied by portfolio owner.
- ADAM Global UAE public website, checked August 2026.
- ADAM Global Network public website, checked August 2026.
- ADAM Global LinkedIn company page, checked August 2026.
- ADAM Global Facebook page and follower snapshot supplied August 2026.
- ADAM Global Instagram @adamglobal.corporateservices follower snapshot supplied August 2026.
- ADAM Global LinkedIn follower snapshot supplied August 2026.
- Portfolio-owner role context: social profiles built/managed and approximate follower levels during tenure.

Prepared as a portfolio case study. The goal is to showcase verified scope and outcomes without inventing missing analytics or overstating legacy attribution.
