

Madam Me Digital Growth & SEO Performance

Premium hair and beauty salon, Sloane Avenue, Chelsea, London

Reporting period: January 15, 2024 - August 11, 2026

Evidence base: GA4 reports snapshot, acquisition, lead, user attributes and Google organic search exports supplied for Madam Me.

From search visibility to salon discovery

The data shows a digital acquisition model led by organic search and direct/brand demand, with content-led SEO creating substantial Google visibility for hairstyles, nails, beauty treatments and Chelsea salon services. Paid Search contributed only a small share of acquisition, making the organic results especially useful as a portfolio example of sustainable search growth.

ACTIVE USERS	PAGE VIEWS	GOOGLE IMPRESSIONS	ORGANIC CLICKS
6,884	31,012	395,134	1,779
GA4 snapshot	All page titles	Organic Search	Google Search

Public business context verified against [madamme.co.uk](https://www.madamme.co.uk) in August 2026. The public website positions Madam Me as a premium hair and beauty salon in Chelsea, London, offering hair, nail, skin and beauty services.

Executive Summary

- **Organic Search became a core acquisition engine.** GA4 attributes 4,677 new users to Organic Search, about 45.0% of the 10,384 new users recorded across acquisition channels.
- **Brand/direct plus SEO accounted for most acquisition.** Direct and Organic Search together contributed 85.4% of recorded new users, limiting dependence on paid media.
- **SEO created a large search footprint.** Google organic landing-page data records 395,134 impressions and 1,779 clicks across the available period.
- **Organic visitors were materially more engaged than paid-search visitors.** Organic Search averaged 97.3 seconds engagement per active user versus 41.5 seconds for Paid Search, about 2.3x higher.
- **Content was a major visibility driver.** The European hairstyles and 2025 nail-trends articles alone generated 860 organic clicks, 48.3% of all Google clicks in the landing-page export.

SESSIONS BY SOURCE	AVG ENGAGEMENT	KEY EVENTS	AI SESSIONS
11,040	79.4s	1,525	13
Source/medium export	Per active user	Not treated as leads	Identifiable AI referrals

Portfolio interpretation: Madam Me demonstrates how SEO content, local-service optimization and brand discovery can build meaningful traffic for a premium local service business without requiring heavy paid-search investment.

Monthly new-user reporting is shown only through January 2026 because the daily new-user series falls to near zero afterward while other cumulative GA4 data continues through August 11, 2026. This is treated as a tracking discontinuity, not a performance conclusion.

Organic Search Outperformed Paid Acquisition

Organic Search generated 4,677 new users, compared with only 300 from Paid Search. That is roughly 15.6x the new-user volume. Direct generated another 4,194 new users, indicating that brand awareness and search discovery were the dominant acquisition pathways.

Organic Search also generated **807 key events**, 52.9% of all 1,525 acquisition key events. Because the dedicated qualified-lead and converted-lead exports are empty, these key events are presented as tracked conversion/engagement signals rather than confirmed sales leads.

Channel	New users	Avg engagement	Key events	User key event rate
Organic Search	4,677	97.3s	807	7.2%
Direct	4,194	74.4s	602	7.7%
Referral	626	57.5s	66	6.8%
Organic Social	534	42.9s	40	5.4%
Paid Search	300	41.5s	2	0.9%
Cross-network	42	52.3s	8	24.1%
Display	7	0.0s	0	0.0%
Unassigned	4	42.0s	0	0.0%

SEO Built a 395K-Impression Search Footprint

The Google organic landing-page export records **395,134 impressions** and **1,779 clicks**. The blended click-through rate is 0.45%, while the impression-weighted average position is approximately 23.5. The opportunity is not just the clicks already generated: the large impression base shows substantial room for CTR gains on pages already appearing in search.

Content-led discovery is the standout SEO win. Search traffic was not limited to branded queries. High-performing informational topics included European hairstyles, nail trends, eyebrow-shape guidance, hairstyles for women over 50, makeup routines and hair-colour ideas. These topics expand discovery beyond users already searching for the Madam Me brand.

Landing page	Clicks	Impressions	CTR	Avg pos.	Engagement
/trending-european-hairstyles-2024/	455	68,390	0.67%	6.4	55.4%
/nail-trends-in-london-2025/	405	26,421	1.53%	7.7	58.8%
/	294	32,269	0.91%	22.4	69.4%
/which-eyebrow-shape-suits-me-the-best-in-2024/	67	45,574	0.15%	19.5	49.0%
/about-madam-me/	44	5,906	0.75%	14.4	69.4%
/contacts/	35	2,246	1.56%	8.8	41.6%
/best-hydrafacial-in-london-south-kensington/	34	21,119	0.16%	54.3	82.6%
/hairstyles-for-women-over-50/	33	11,445	0.29%	4.7	51.1%
/price-list-of-hair/	29	4,235	0.68%	36.3	45.5%
/minimalist-makeup-routine-for-busy-mornings/	27	9,605	0.28%	8.8	53.8%
/gentleman-services/	26	2,228	1.17%	10.9	66.7%
/our-services/	25	6,079	0.41%	8.7	59.7%

Non-Branded Search Created New Discovery Paths

Google exposes 443 clicks at query level in the supplied export. Of those visible-query clicks, approximately **289 came from non-branded queries**. This is important for a local salon because it demonstrates discovery from beauty needs and trends, not only searches for the Madam Me name.

Examples of non-branded organic queries

Search query	Clicks
european hairstyles female	33
european hairstyles	15
european women hairstyles	13
quick makeup tips for busy mornings	9
european haircut women	8
nail trends 2025 uk	8
shag haircut women	7
european haircut	5
nails design	5
what eyebrow shape suits me	5
european hair styles	4
european hairstyles for women	4
nail designs	4
trendy simple nail designs	4
european hairstyles female 2024	3
gentleman service	3
hydrfacial chelsea	3
hydrfacial kensington	3
nail ideas	3
nail salon sloane square	3

SEO implication: the highest-impression pages with low CTR are the fastest optimization opportunity. Better titles/meta descriptions, freshness updates, FAQ/schema enhancements and stronger service CTAs can turn existing visibility into more site visits and bookings.

Website Content Supported Discovery and Booking Intent

The page-title export contains **31,012 views**. The homepage is the largest owned-site page, while Fresha booking pages also appear prominently, indicating that the website-to-booking journey is visible inside the analytics footprint.

High-view service and commercial pages include the menu, services hub, Hydrafacial, hair salon, manicure, hair pricing and contact pages. This creates a useful full-funnel portfolio story: informational content brings people into search, while service, price and booking surfaces support commercial intent.

The Audience Is Strongly UK and London Led

The United Kingdom contributes **4,169 active users**, about **60.6% of the total**. London alone contributes 2,648 active users, approximately 38.5%. This geographic concentration aligns well with Madam Me's Chelsea location and local-service positioning.

International visibility is also present. The United States, UAE, India, Canada, France and Australia all contribute measurable users. Dubai is the third-largest city in the user-attributes export, which is useful evidence of international brand discovery for a London luxury salon.

Audience Signals Support a Premium Beauty Positioning

English is the dominant reported language with **6,031 active users**, followed by Russian, Spanish, French, Arabic and Ukrainian. This suggests the website is primarily serving an English-speaking London market while still attracting a multilingual international audience.

Top languages

Language	Active users
English	6,031
Russian	184
Spanish	87
French	86
Arabic	72
Ukrainian	67
German	60
Italian	46
Chinese	41
Portuguese	27

Among users for whom GA4 reports age, **60.6% are 18-34**. Among users with a reported gender signal, **63.6% are female**. These are directional only because age and gender are available for a minority of the total user base.

Selected audience interests

Interest category	Active users
Travel/Travel Buffs	259
News & Politics/Avid News Readers/Entertainment News Enthusiasts	247
Technology/Technophiles	184
Shoppers/Shopping Enthusiasts	166
Food & Dining/Cooking Enthusiasts/Aspiring Chefs	159
Lifestyles & Hobbies/Shutterbugs	145
Banking & Finance/Avid Investors	143
Beauty & Wellness/Beauty Mavens	135
Media & Entertainment/Movie Lovers	133
News & Politics/Avid News Readers	133
Home & Garden/Home Decor Enthusiasts	125
Sports & Fitness/Sports Fans/Soccer Fans	118

Coverage caveat: gender signals cover 12.9% of active users and age signals cover 11.8%. Demographic percentages should therefore be treated as directional, not as the full customer profile.

Measurement Findings Strengthen the Case Study

- **Key events exist, but lead-stage events do not.** Acquisition reports contain 1,525 key events, while qualified leads and converted leads both total zero in the dedicated lead export. The report therefore avoids claiming 1,525 leads.
- **New-user daily tracking appears disrupted after January 2026.** The series drops to near zero while cumulative page, source and user-attribute data continues through August 11, 2026. This should be fixed before future month-over-month reporting.
- **Self-referral traffic is present.** madamme.co.uk appears as a referral source, suggesting referral-exclusion/cross-domain configuration should be checked so sessions are not fragmented.
- **AI discovery has started but remains early.** 13 identifiable sessions came from ChatGPT/Perplexity sources in the source-medium export, creating a baseline for future AEO/GEO optimization.

Five actionable recommendations

- **Refresh the winning content clusters.** Update European hairstyles, nail trends, eyebrow guidance, hair-colour and beauty-routine articles with 2026 freshness, stronger internal links and commercial CTAs.
- **Convert impressions into clicks.** Prioritize high-impression/low-CTR URLs for title/meta rewrites, FAQ enhancements and richer search snippets.
- **Strengthen local SEO around Chelsea intent.** Build deeper service-location pages for Chelsea, Sloane Square, South Kensington and nearby high-intent treatments.
- **Fix attribution and conversion measurement.** Separate appointment booking, form submit, phone/WhatsApp click and confirmed booking events, and remove self-referrals.
- **Build an AEO/GEO layer on top of SEO.** Structure treatment pages around direct questions, expert answers, schema and citation-worthy content so AI assistants can more confidently surface Madam Me.

Portfolio Positioning

A credible portfolio should emphasize the acquisition system and search footprint rather than inventing revenue or lead numbers that are not present in the export.

Suggested achievement statement

Helped build and optimize Madam Me's digital acquisition and SEO presence for a premium Chelsea beauty salon, contributing to a GA4 footprint of 6,884 active users and 31,012 page views, while Google organic content generated 395,134 search impressions and 1,779 clicks. Organic Search accounted for 45% of recorded new-user acquisition and delivered 2.3x the average engagement time of Paid Search, demonstrating strong organic visibility with limited dependence on paid media.

Why this case study is valuable

- Shows SEO and content growth for a premium local-service business.
- Demonstrates a practical organic-vs-paid acquisition story using GA4 evidence.
- Includes Search Console style landing-page performance, not just website sessions.
- Shows local London relevance alongside international reach.
- Demonstrates analytics judgment by identifying tracking gaps instead of inflating conversion claims.

Appendix: 84 Organic Landing Pages with Search Visibility

Ranked by Organic Google Search impressions to show the pages with the largest search footprint. CTR = clicks / impressions. Average position is the Google organic search average position from the supplied export.

Sources, Scope and Caveats

Analytics source files supplied by the user: Reports_snapshot (6).csv; Generate_leads_overview (3).csv; User_acquisition_First_user_primary_channel_group_(Default_Channel_Group) (3).csv; User_attributes_overview (2).csv; Google_organic_search_traffic_Landing_page_+_query_string (1).csv.

Analytics period: January 15, 2024 - August 11, 2026.

Public business context: madamme.co.uk homepage, About, Services and Contact pages reviewed August 12, 2026.

Metric caveats: Source/medium sessions total 11,040 in the supplied source export and should not be assumed to equal every possible session metric from other GA4 reports. GA4 key events are not described as leads because the qualified-lead and converted-lead exports contain zero values. Age and gender data cover only a subset of users. The daily new-user series appears discontinuous after January 2026.

Portfolio use: This report intentionally emphasizes verified acquisition, SEO, content, engagement and audience evidence. It does not invent revenue, ROAS, booked-appointment totals or confirmed lead numbers that are not present in the source data.
